Skills Anticipation and Matching: How much do you know?

The ETF's digital toolkit offers a virtual course on skills anticipation and matching tools. The toolkit is based on the ETF-CEDEFOP-ILO methodology laid out in **six methodological guides** on developing tools for skills anticipation and matching and supporting their implementation.

Who can benefit?

The e-toolkit is designed to benefit policy makers, practitioners and social partners working to spot trends and drivers for current and future skills requirements, which lie at the heart of a successful strategy to make education and training responsive to labour market needs. Young people and job seekers can also benefit from the course through increasing their knowledge on education and training and employment policies…
